

8.2 | The Experts in Renewable Energy

The **8.2 Group e.V.** is the heart of the 8.2 Network. United by the Articles of Association, 34 internationally working member units share the common brand “8.2”.

The 8.2 Network unites experts with years of experience as well as engaged young professionals committed to the sustainable value of renewable energy projects. For the areas wind and solar energy, energy storage, grid integration and QHSE, the 8.2 Network offers independent expertise, an extensive range of technical and consulting services as well as inspections.

With partners worldwide and local engineering offices of different expertise, projects of different sizes can be handled – by well-established teams in high quality and with a direct contact person.

Managing Director and Brand Manager (m/f/d)

Your Tasks:

DIRECT and DEVELOP this interesting and successful Network in a politically, technically and legally dynamic environment as well as REPRESENT its expertise and skills within the respective markets. Your work will include:

- Direction of the registered association 8.2 Group as managing director
- Organisation and development of the 8.2 Network
- Integration of member companies in the strategic development
- Intensification of Group-wide marketing and branding strategy
- Development and organisation of branding projects in cooperation with the worldwide working Group members

Your Profile:

- Completed studies in business administration, marketing, communication sciences or comparable
- Several years of relevant professional experience, preferably in the area of renewable energy
- Integrative personality with knowledge in mediation and/or moderation
- Willingness to engage in frequent outside contacts and business travels
- Business fluent in German and English

We Offer:

- Permanent full-time position with flexible working hours and location
- Independent action in a collegial environment of a unique network of experts
- High degree of creative freedom in diverse areas of responsibility

Help us to advance the future-oriented sector of renewable energy and send your application electronically to:
